AVITA Medical Welcomes Support for RECELL® in Burns in Australia

October 28, 2025

- *Australia's Medical Services Advisory Committee (MSAC) recognizes RECELL ® as safe and effective, with benefits in healing, donor site sparing, and reduced hospital stays*

VALENCIA, Calif., Oct. 28, 2025 (GLOBE NEWSWIRE) -- AVITA Medical, Inc. (NASDAQ: RCEL, ASX: AVH) ("AVITA Medical," or the "Company"), a leading therapeutic acute wound care company, today announced that Australia's Medical Services Advisory Committee ("MSAC") has recommended amendments to the Medicare Benefits Schedule ("MBS") to include the use of autologous skin cell suspension ("ASCS") prepared with RECELL for the treatment of severe acute burn wounds in adults and children.

"MSAC's position is a powerful endorsement of RECELL's clinical impact and the difference it makes in patients' lives," said Katie Bush, PhD, Senior Vice President, Scientific & Medical Affairs. "It reflects growing confidence in RECELL as a transformative approach in burn care and represents our shared goals of improving outcomes for patients and supporting clinicians with innovative treatment options."

MSAC concluded that RECELL is as safe and effective as traditional autologous skin grafting, while providing superior outcomes in donor site sparing and reducing the need for additional grafting procedures. MSAC further acknowledged that RECELL can shorten hospital stays, ease patient pain, and minimize scarring.

Severe burns often require surgery to close the wound, which usually involves taking healthy skin from another part of the body and grafting it onto the burn. This process can be painful, leaves lasting scars at the donor site, and often requires long hospital stays.

RECELL works differently. By taking a very small piece of the patient's own healthy skin, doctors can prepare a suspension of skin cells that is sprayed onto the wound. This can:

- Reduce the need for large skin grafts, lowering pain and scarring at donor sites
- Shorten hospital stays, helping patients recover faster and return to daily life sooner

The MSAC recommendation supports the use of RECELL for:

- Adult patients with burns covering ≥20% of total body surface area ("TBSA")
- Pediatric patients with burns covering ≥10% TBSA
- Whole-of-face burn wound closure

About AVITA Medical, Inc.

AVITA Medical® is a leading therapeutic acute wound care company delivering transformative solutions. Our technologies are designed to optimize wound healing, effectively accelerating the time to patient recovery. At the forefront of our platform is the RECELL® System, approved by the U.S. Food and Drug Administration for the treatment of thermal burn and trauma wounds. RECELL harnesses the healing properties of a patient's own skin to create Spray-On Skin™ Cells, offering an innovative solution for improved clinical outcomes at the point-of-care. In the U.S., AVITA Medical also holds the rights to manufacture and exclusive rights to market, sell, and distribute PermeaDerm®, a biosynthetic wound matrix, and the exclusive rights to market, sell, and distribute Cohealyx™, an AVITA Medical-branded collagen-based dermal matrix.

In international markets, the RECELL System is approved to promote skin healing in a wide range of applications including thermal burn and trauma wounds, with regulatory clearances in Europe, and excluding RECELL GO, in Australia and Japan.
