

## **RECELL® System to be Highlighted at Upcoming Music City SCALE Multidisciplinary Dermatology Meeting**

---

**VALENCIA, Calif. and MELBOURNE, Australia, 09 MAY 2022** — AVITA Medical, Inc. (NASDAQ: RCEL, ASX: AVH) (Company), a regenerative medicine company that is developing and commercializing a technology platform that enables point-of-care autologous skin restoration for multiple unmet needs, announced today that a discussion on the RECELL System will be held during the Symposium for Cosmetic Advances & Laser Education (SCALE) multidisciplinary dermatology meeting taking place May 11-15 in Nashville, TN. SCALE is the premier multidisciplinary meeting for aesthetic medicine, plastic surgery and medical dermatology.

The presentation will feature Dr. Jeffrey Carter, FACS, Associate Professor of Surgery and Medical Director, UMCNO Burn Center at LSU Health in New Orleans, who will discuss the use of the RECELL System for treatment of burn injuries. Additionally, Dr. Seemal Desai, FAAD, Diplomate of the American Board of Dermatology, and a Board-Certified Dermatologist, will review the clinical trial protocol aimed at establishing safety and effectiveness for repigmentation of stable vitiligo lesions utilizing the RECELL System. The discussion, “RECELL: A Novel Treatment Strategy for Regenerative & Restorative Skin Conditions” will take place Thursday, May 12 from 2:30-2:40 pm CDT.

“It is important for us to share clinical evidence and peer insights related to the RECELL System with leaders of the dermatology community to help physicians make educated treatment decisions for their patients,” said Dr. Mike Perry, Chief Executive Officer of AVITA Medical. “As we pursue the vitiligo indication, our vision is to offer the community an innovative solution to better serve the millions of people who suffer with this disease.”

Vitiligo is a disease that attacks pigment-producing cells, called melanocytes, resulting in their destruction or malfunction. The result is a loss of pigmentation in patches of skin. Vitiligo affects up to 2% of the population worldwide,<sup>i</sup> including an estimated 3-6.5 million Americans.<sup>ii</sup> Vitiligo has a comparable market size and psychosocial impact to other major dermatology diseases including psoriasis (thick, scaly skin) and atopic dermatitis (red, cracked skin).<sup>iii iv v</sup> Like these diseases, those living with vitiligo may suffer from poor body image along with low self-esteem, leading to an impaired quality of life.<sup>vi</sup>

AVITA Medical is currently completing a pivotal trial for the use of the RECELL System for treatment of stable vitiligo. Currently, the RECELL System is indicated in the U.S. for treatment of acute thermal burns. Our vitiligo clinical trial aims to demonstrate safe and effective repigmentation when using the RECELL System in combination with phototherapy. Topline data from the trial will be shared later this year.

#### **ABOUT AVITA MEDICAL, INC.**

AVITA Medical is a regenerative medicine company with a technology platform positioned to address unmet medical needs in burns, chronic wounds, and aesthetics indications. AVITA Medical's patented and proprietary collection and application technology provides innovative treatment solutions derived from the regenerative properties of a patient's own skin. The medical devices work by preparing a RES<sup>®</sup> REGENERATIVE EPIDERMAL SUSPENSION, an autologous suspension comprised of the patient's skin cells necessary to regenerate natural healthy epidermis. This autologous suspension is then sprayed onto the areas of the patient requiring treatment.

AVITA Medical's first U.S. product, the RECELL<sup>®</sup> System, was approved by the U.S. Food and Drug Administration (FDA) in September 2018. The RECELL System is indicated for use in the treatment of acute thermal burns. The RECELL System is used to prepare Spray-On Skin<sup>™</sup> Cells using a small amount of a patient's own skin, providing a new way to treat severe burns, while significantly reducing the amount of donor skin required. The RECELL System is designed to be used at the point of care alone or in combination with autografts depending on the depth of the burn injury. Compelling data from randomized, controlled clinical trials conducted at major U.S. burn centers and real-world use in more than 10,000 patients globally reinforce that the RECELL System is a significant advancement over the current standard of care for burn patients and offers benefits in clinical outcomes and cost savings. Healthcare professionals should read the INSTRUCTIONS FOR USE - RECELL<sup>®</sup> Autologous Cell Harvesting Device (<https://recellsystem.com/>) for a full description of indications for use and important safety information including contraindications, warnings, and precautions.

In international markets, our products are marketed under the RECELL System brand to promote skin healing in a wide range of applications including burns, chronic wounds, and aesthetics. The RECELL System is TGA-registered in Australia and received CE-mark approval in Europe. To learn more, visit [www.avitamedical.com](http://www.avitamedical.com).

#### **CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS**

*This press release includes forward-looking statements. These forward-looking statements generally can be identified by the use of words such as "anticipate," "expect," "intend," "could," "may," "will," "believe," "estimate," "look forward," "forecast," "goal," "target," "project," "continue," "outlook," "guidance," "future," other words of similar meaning and the use of future dates. Forward-looking statements in this press release include, but are not limited to, statements concerning, among other things, our ongoing clinical trials and product development activities, regulatory approval of our products, the potential for future growth in our business, and our ability to achieve our key strategic, operational and financial goal. Forward-looking statements by their nature address matters that are, to different degrees, uncertain. Each forward-looking statement contained in this press release is subject to risks and uncertainties that could cause actual results to differ materially from those expressed or implied by such statement. Applicable risks and uncertainties include, among others, the timing of regulatory approvals of our products; physician acceptance, endorsement, and use of our products; failure to achieve the anticipated benefits from approval of our products; the effect of regulatory actions; product liability claims; risks associated with international operations and expansion; and other business effects, including the effects of industry, economic or political conditions outside of the company's control. Investors should not place considerable reliance on the forward-looking statements contained in this press release. Investors are encouraged to read our publicly available filings for a discussion of these*
